

Ans: to the ques: no. 5

a) First generation

Architecture of first generation  
of computers.

C.P.U

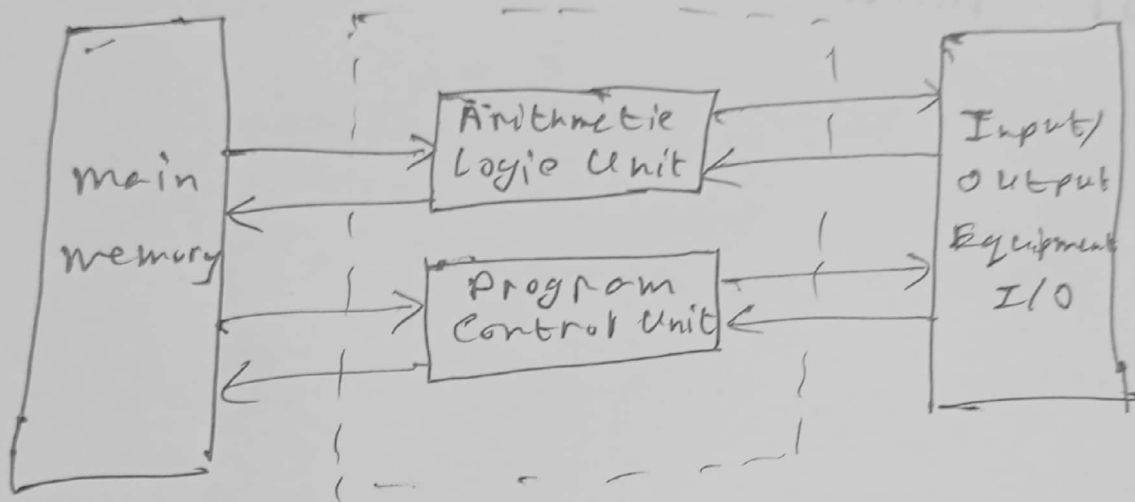

Fig: structure of first generation computer

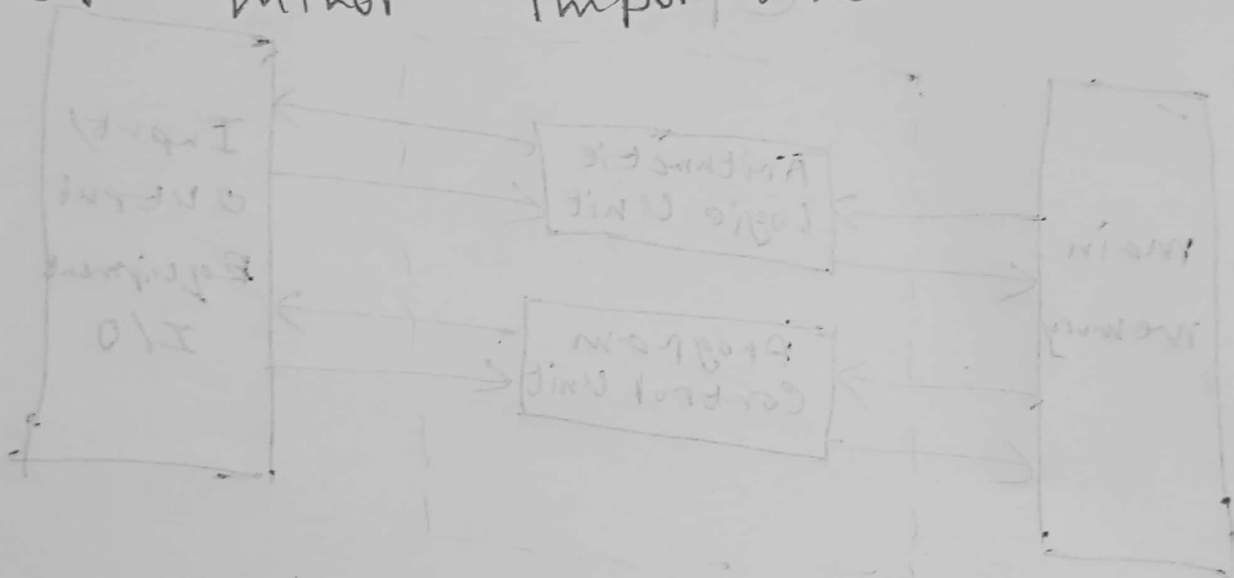

First generation computer limitations:

- ① Its computing speed is limited  
inertia of its moving parts and
- ② the transmission of digital

information is quite unreliable

3) Less cpu register and no cache memory.

1) I/O instructions were considered of minor importance

5(b)
